CLINICAL ASPECTS OF MALARIA

Ye. M. Tareyev

Monograph giving systematic description of the pathogenesis, semiotics development peculiarities, diagnosis and treatment of malaria. No mention of causes and carriers of malaria or epidemiological aspects of the disease. Clinical aspects, particularly the effect that malaria has on various organs. Data obtained from Central Institute of Malaria and Medical Parasitology under Ye. I. Martseynovskiy and the Faculty Therapeutic Clinic III, Moscow Medical Institute.

TABLE OF CONTENTSPage

Foreword	3
Introduction	4
I. General Comments on Malaria	7
Types and course of malaria	7
Primary malaria (malaria recens, malaria primaria, primary attack, primary complex)	10
Period of relapses and inter-paroxysmal latency (malaria recidivis, malaria latens)	14
Chronic malaria (period of secondary reinfection) Retarded forms of malarial infection (malaria invenetaria)	15
Paramalaria (Parapuldisme)	17

## Clinical classification of malaria

Immunity. Interrelationship of the macroorganism and  
the microorganism. Pathogenic problems

22

The course of malaria in cases with single and  
recurrent attacks

23

The parasitic characteristic of malaria and immunity.  
interrelationship of the macroorganism and the micro-  
organism, the host and the parasite

31

The mechanism of antimalarial immunity

44

A. The cellular factor of immunity in malaria cases

44

B. Humoral immunity

48

The characteristics of immunity in malaria cases in  
comparison with acute (exanthematos) infections

52

Immunity and chemotherapy of malaria

55

Immunity and epidemiology of malaria

59

Pathogenesis of the malarial process

60

Malaria cases complicated with other diseases

62

II. The Basic Clinical Triad. Infection of the Spleen,  
Liver, and Blood

68

The Spleen

68

Reaction of the spleen in primary or recurrent cases  
with malarial paroxysms

69

Research on the spleen

71

Splenometry

72

Chronic malarial splenitis

72

Rupture of the spleen

73

The course of malaria in cases uncomplicated  
by other splenic diseases

75

Paramalarial splenomegaly

76

The Liver

77

Acute malarial hepatitis

77

Subacute and chronic malarial hepatitis

80

Paramalarial cirrhosis

82

Gallstones

84

Functional inefficiency of the liver

85

Variations in the blood	
Hematological changes	
Pathogenesis of anemia in malaria cases	97
Rare forms of anemic syndromes	103
Biochemical abnormalities	111
<b>III. Infection of Other Organs</b>	122
Dermatological symptoms	122
The lungs	127
The central vascular system	129
Kidneys	135
The gastrointestinal tract	145
The nervous system and the sensory organs	149
The effect on the nervous system and the optic organs of malaria cases during chemotherapy	156
<b>IV. Special Forms</b>	164
Malarial coma	164
Other malignant forms of malaria	179
Hemoglobinuric fever	187
Therapeutical malaria	199
<b>V. Diagnosis, Differential Diagnosis, and Prognosis of Malaria</b>	218
Various diagnostic methods	218
General diagnostic procedures	229
Differential diagnosis of febrile syndrome	233
Differential diagnosis of splenomegalic syndrome	239
Prognosis of malaria	241
<b>VI. Prophylaxis and Treatment of Malaria</b>	245
Chemotherapy	246
Chemoprophylaxis of malaria	249
Treatment in primary attack. Impeding the malarial paroxysms	251
